

Please do not replace FM translators with LPFM. K-LOVE radio is the only radio station that plays the kind of music that I enjoy in my area. If K-LOVE could not broadcast on a Transmitter then our area would have no music of this type. Our area has every other type of music and talk radio stations available for listeners of every type. K-Love is the only one of its type available. It keeps me informed of important news which I would not get anywhere else. It also provides important public announcements that I would not get from any other station. K-LOVE provides wholesome family music and news that other stations do not provide.
